

# APC Hip Retractor Series

Designed by APC, Inc.

*Used to help provide wide exposure of the acetabulum*

The single prong retractor is designed to be placed around the inferior-posterior edge of the acetabulum for wide exposure during total hip replacement. Modular weights can be used to help hold the retractor in place.

The double prong retractor is designed to retract the femur anteriorly during total hip arthroplasty. It is hooked over the anterior pelvic brim.
