

Femoral Head Removal Pin

Used to help remove a femoral head during total hip surgery

Partial threaded pin can be used to help remove a femoral head during total hip surgery. The pin is especially helpful in minimally invasive total hip surgery where access to the femoral head is limited. The pin is attached to a pin driver which clamps onto a Jacob chuck. When the pin is drilled in place, the driver is easily removed from the pin, as the pin is held by a friction ring. The head can be removed by gripping the pin by hand or by using a large pin inserter/extractor.

PRODUCT NO'S:

1310 [Pin] Overall Length: 9" Diameter: 5/32"
1205 [Pin Driver]
3030 [Pin Inserter/Extractor]
3032 [Two-Pin Extractor]
