

K-Wire Bender/Cutter

Designed to bend a K-wire while extending from bone without applying mechanical strain

The K-wire only needs to extend 20 mm from the skin surface to be bent.

Can bend and cut K-wires measuring 1 to 1.6 mm (.039"-.062") in diameter

MADE EXCLUSIVELY
FOR INNOMED IN
GERMANY

PRODUCT NO:
2111
Overall Length: 6.5" (16,5 cm)

Bending
With the jaw of the instrument opened wide, the K-Wire is inserted from the side into one of the slots of the lower jaw. During bending, the K-Wire is forced backwards by the nose of the upper jaw and guided by a small groove.

Cutting
The K-Wire is inserted into the cutting groove and the bender/cutter cuts by shearing (like a cigar cutter), not crushing. The result is a clean and burr-free cut surface.

1 and 1.2 mm 1.2 and 1.6 mm

The right slot of the instrument's lower jaw can hold K-Wires with a diameter of 1.2 mm or 1.6 mm. The smaller left slot can hold K-Wires measuring 1 mm or 1.2 mm in diameter.
