

Large Bone Curettes

Designed with a 5/16" (8 mm) diameter shaft allowing better visualization into the medullary canal

The contoured handle is designed to keep the curette from slipping in the surgeon's hand and for better control. The Angled Large Curette is designed for use in the acetabulum or exposed bone. The 10.5" (26,7 cm) shaft is 5/16" (8 mm) in diameter and has a contoured handle.
