
Macko Square Tipped Rongeur

Designed by Victor W. Macko, MD

Square tipped rongeur with an ergonomic grip, double action mechanism, long reach, and low profile – for use in total ankle, hip, knee, and spine surgery

In total ankle surgery, the aggressive, low profile jaws aid in the removal of tibial bone in spite of limited space. The square ended tip helps produce a flat, finished surface following anterior talar facet reaming.

When used for morcelizing bone graft, the shallow, wide jaw helps avoid impaction.

Two Jaw Sizes Available

PRODUCT NO'S:
1778-01 *Jaw Bite: 5 x 18 mm* *Overall Length: 10" (25,4 cm)*
1778-02 *Jaw Bite: 7 x 18 mm* *Overall Length: 10" (25,4 cm)*
