

Sanders Femoral Neck Cutting Blocks

Designed to help with the accurate placement of the femoral neck osteotomy in total hip surgery

Used to measure the distance from the proximal end of the lesser trochanter to the level of the femoral neck osteotomy. The desired level of the femoral neck osteotomy is determined by preoperative planning. The exact level of the femoral osteotomy helps with leg length, either maintaining equal leg length or correcting leg length discrepancies.

Product No's:
Overall Length: 6.5"
4555 5 x 10 mm
4560 10 x 10 mm
4565 10 x 15 mm
4570 10 x 20 mm
4575 10 x 25 mm
