**Sanders Tube Holder**

*Designed to help stabilize the Sanders Extremity Positioning Tubes (#2740-01 & -02)*

The tube holder will help stabilize the tubes when used for lower extremity positioning for lower extremity surgery. Also, by using the tubes with the Stulberg Sliding Bolster (#2730), the knee can be placed in less flexion during the initial incision and wound closure.

*PRODUCT NO:* 2740-03

*MADE IN THE USA*

*PROUDLY*

When used with the Stulberg Sliding Bolster (#2730), the Tube Holder is designed to prevent rolling and side-to-side tipping on the center rail of the Bolster. It can be placed anywhere along the rail of the Bolster, so that tubes can support the ankle and knee simultaneously.
