

## Stanton Locking Drill Guide Holder for Distal Humeral, Femoral, or Tibial Screws

Designed by John L. Stanton, MD

*Designed to help hold and stabilize a drill guide, allowing the surgeon to obtain 'perfect circles' and drill distal locking screw holes without exposure of the hand to the x-ray beam*

The drill guide is placed over the side of the bone through an incision. The holder is attached to the guide and rested against the skin for stability. With the x-ray on, the guide tube is adjusted by moving the holder until the guide lines up with the hole in the rod. A drill bit is then inserted into the guide.

**PRODUCT NO:**

8987

Overall Length: 10.5" (26,7 cm)

Guide Height: 21 mm

Closed Guide Internal Diameter: 5,5 mm

USA MADE

ISO 9001:2008 • ISO 13485:2003
