

Whelan Double-Ended Suture Wire Passer

Designed by Edward J. Whelan, III, MD

Passer guide and malleable passer designed to pass suture wires around a bone

The passer guide is placed around the bone, and the thin malleable passer is inserted at the handle end and follows the grooved passer around. The suture wire (up to 18 gauge) is attached to the keyholed end of the passer, which can then be reversed out of the passer, drawing the suture wire around the bone.

Insert passer into guide to pass around the bone

Attach suture wire, then draw the passer/suture wire back around the bone

Set includes Passer Guide, two Passers, and a sterilization case.

PRODUCT NO'S:

8300-00 [Set]

Also available individually:

8300-01 [Passer Guide]

Overall Length: 8.125" (20,6 cm)

Outside Width: 9 mm
