Bargo Bone Holding Clamp

Designed to aid in the reduction of various fractures such as: spiral, transverse, compound, oblique, or butterfly. The clamp can also be used to secure a plate in place while the screw holes are being drilled and screws inserted. The fracture site can also be manipulated with the clamp being used as a lever. Available in two sizes, large and small, it has teeth in the jaws for a better grip and a ratchet locking handle for use on various bone diameters.

Designed by
Lonnie Bargo, CST/CFA

Product No's:
1895-02 [Large]
1895-01 [Small]

*Designed to aid in the reduction of various fractures,
and can help secure a plate in place during installation*
